Professional Summary

Data tells powerful stories — if you know how to analyze it.

With a background in Business Administration and specialized training in Data Analytics, I bridge business needs with analytics. I work with SQL, Python, Excel, Power BI, and Tableau to transform raw data into structured reports and interactive dashboards that highlight key performance patterns.

I'm currently seeking entry-level opportunities in Data Analytics where I can apply my skills, continue learning, and contribute to data-driven decision-making.

Made with GAMMA

Core Competencies

Data Analysis

Cleaning, analyzing, and interpreting complex datasets to uncover meaningful patterns and trends.

SQL

Writing efficient queries to extract, manipulate, and analyze data from relational databases.

Python

Using Python for data analysis, automation, and creating powerful analytical solutions.

Excel

Advanced Excel skills for data manipulation, reporting, and business analytics tasks.

Power BI

Building interactive dashboards and visualizations to communicate insights effectively.

Tableau

Creating compelling data visualizations and dashboards for business intelligence purposes.
